F[ai]th Works

AI Workflow Starter Kit

Choose one recurring task and map your first useful AI workflow.

Start here

01 Choose one task

02 Map the workflow

03 Test a small version

Free practical guide for non-technical founders and professionals

Stop collecting AI tools. Start with one useful workflow. Use these worksheets to choose a recurring task, organize your inputs, and plan a first version you can test, with a person reviewing the result.

Start here

Read me first

How the learning journey works and how to use the kit. Work through one task at a time, at your own pace. You can type into this PDF or print it and write by hand.

01

Choose one task

Use the task selector to compare three recurring tasks and pick one.

02

Map the workflow

Write down the goal, the inputs, the output and who reviews it.

03

Test a small version

Try one low-risk case, review the result, then decide what to improve.

What's in the kit

PDF

Worksheets

This file: seven short parts with space to write.

TXT

Prompt sheet

A plain-text prompt you can copy into your AI tool.

How to use it

- Pick just one task. A small, frequent task is the best place to start.
- Map before you build. Fill in the readiness map before you write a prompt.
- Keep a person in the loop. Every example marks the point where someone reviews the output.
- Start small. Test one low-risk case and record what happened.

My starting date

02 • Part 2 of 7

Task selector

Pick just one

Compare three recurring tasks by frequency, effort, risk and ease of review.
Rate each one from 1 (low) to 3 (high), then pick just one.

Task	Frequency	Effort	Risk	Easy to review?
Example: weekly update	3	2	1	Yes

My first task

Check what makes it a good first task:

☐ Frequent ☐ Low risk ☐ Easy to review

Why this one?

Tip

In the example, the weekly update is the pick: it is frequent, low risk and easy to review.

03 · Part 3 of 7

Workflow readiness map

Map before you build

Map before you build. Describe the task you picked: the goal, the owner, the current steps, approved inputs, the desired output, human review and escalation.

Inputs → AI AI step → Human check → Output

Goal What should it achieve?

Owner Who is responsible?

Current steps How is the task done today, step by step?

Approved inputs What may be used?

Desired output What does good look like?

Human review Who checks what?

Escalation When, and to whom?

04 • Part 4 of 7

Prompt starter

Copy, then adapt

An editable prompt in six parts: role, task, context, output, constraints and review. Copy it, then adapt it. The same prompt is in the plain-text prompt sheet.

Role Who should the AI act as?

Task What exactly should it do?

Context Background, audience and approved inputs.

Output Format and length.

Constraints What to avoid or always do.

Review Who checks the draft before it is used?

Completed example

Role
You are an assistant helping me write a weekly team update.

Task
Draft this week's update from my notes below.

Context
Audience: my team. Use only the notes I paste here. Notes: [paste notes]

Output
A short update: wins, priorities, blockers. Under 200 words.

Constraints
Do not add facts that are not in my notes. Mark anything unclear.

Review
I read and edit the draft before sending it.

Review before use

05 • Part 5 of 7

Three examples

Illustrative

Content planning, lead follow-up and team knowledge. These are illustrative, not results, and each one marks the point where a person reviews the work.

AI AI helps to ○ A person checks ■ The output

01 • Content planning

AI Draft angles ○ Check every claim

How could this apply to your work?

02 • Lead follow-up

AI Summarize ○ Check pricing

How could this apply to your work?

03 • Team knowledge

AI Cite the source ○ Escalate

How could this apply to your work?

06 • Part 6 of 7

Small test plan

Start small

Try one low-risk case, record quality, time and errors, and choose the next improvement.

01 • Try one case

Which low-risk case will you test first?

02 • Record

Log each try during your test week. A person reviews every output.

Day	Quality (1–5)	Time taken	Errors found	Reviewed
M				☐
T				☐
W				☐
T				☐
F				☐

03 • Next improvement

What worked? What will you change before the next test?

Decision

☐ Keep using it ☐ Improve and test again ☐ Try a different task
