Faith Works

Version 1.2 October 2026

Brand guidelines

A visual identity for human-centred AI education, strategy and leadership development. Built from the reference board, not the current website.

Feather gradient AI iconography Node system

For internal design use. Awaiting approval.

One system, built from the reference board.

This deck sets out a new visual expression for Faith Works. The colours, typeface and logo stay. Everything about how they are used has been rebuilt from the reference board, with no input taken from the current website. Version 1.2 assigns each reference one job: hero gradient, nodes, backgrounds, AI icons and the closing CTA.

How to read the labels

Established Brand fact supplied by Faith Works: colours, typeface, logo, focus areas.

From reference Reproduces a supplied reference's design language, recoloured to the palette.

Proposed A design decision made in this deck. Open for review before it ships.

31 Checklist

Established focus Proposed wording

Make AI useful, human and lasting for the people who lead.

What we do

Education, AI, strategy, leadership development and long-term business growth, delivered as masterclasses, workshops and advisory.

Who it is for

Business owners, leaders and teams who want to use AI well, not just quickly, and who value guidance from people they trust.

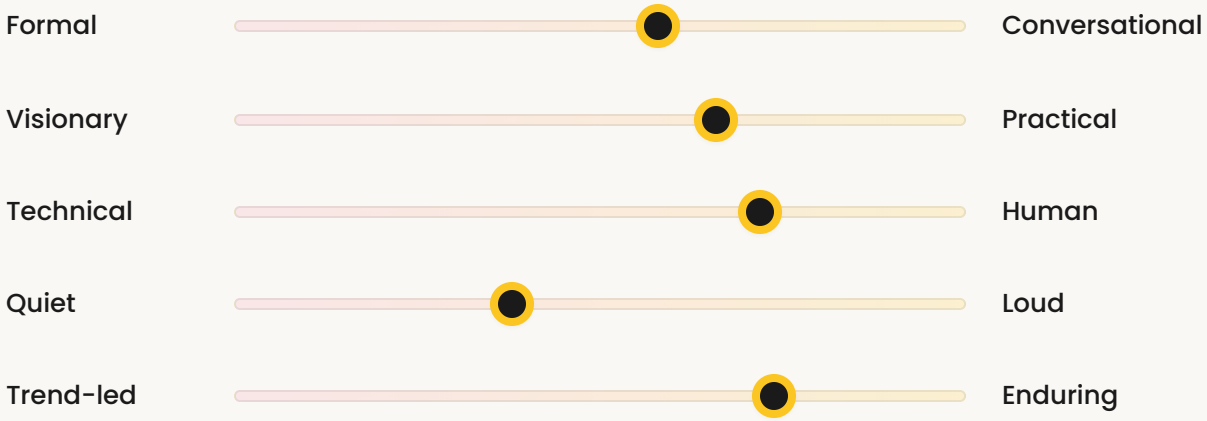

Why it is different

Professional authority with a human voice. Practical learning first, technology second, and growth measured in years, not launches.

Where the brand sits

Proposed

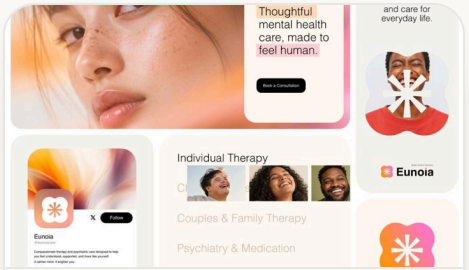

Each line is a spectrum. The marker shows where Faith Works should land in design and copy.

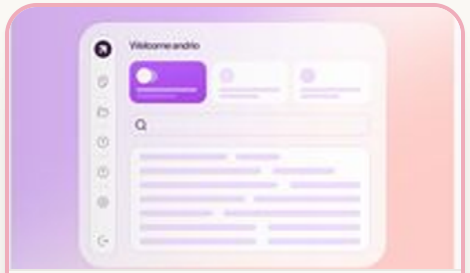

Assured · Warm · Clear · Grounded · Encouraging

Voice in practice

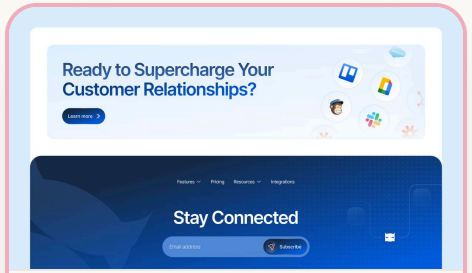

We say	"You will leave with three workflows you can use on Monday."
Not	~~"Unlock the limitless power of next-gen AI."~~
We say	"AI does the drafting. You keep the judgement."
Not	~~"Let AI replace your busywork forever."~~
We say	"Book a call" and "See the programme".
Not	~~"Submit" or "Click here".~~

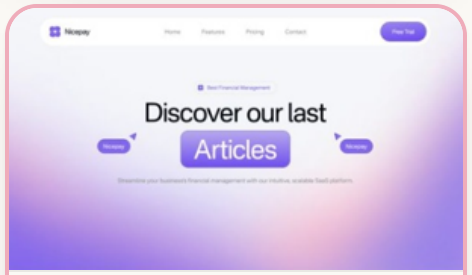

R02 Warm portrait, highlight blocks, black pill

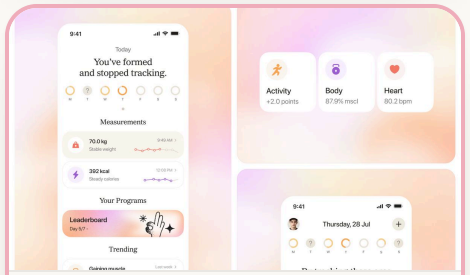

Background spec
Painted field, outlined card

CTA spec
Banner, logo bubbles, footer

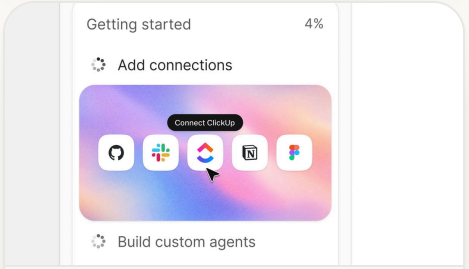

Hero spec
Gradient only, mirrored

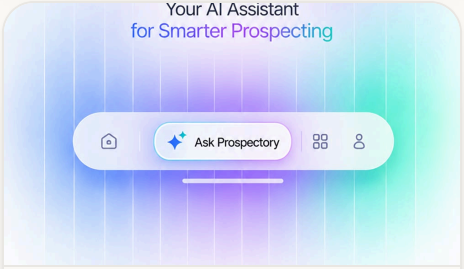

Icon spec
Tinted tile, filled glyph

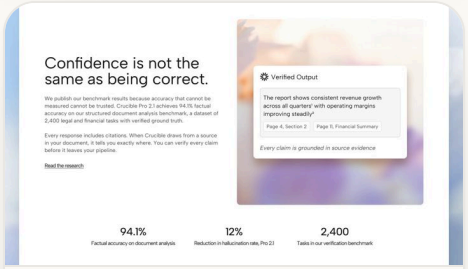

Node spec
Hub, circles, trunk wires

Soft multi-stop mesh inside a card

Light column with vertical striation

R16 Paper panel floating on a photo

32 references, eight recurring signals

Counts are approximate. References outlined in pink are binding, each for one job only: hero gradient, icons, nodes, backgrounds, CTA.

Soft colour fields behind content	22
Light cards floating on colour	17
Varied gradients: dome, mesh, sweep, column	15
Glowing pill buttons and gradient badges	10
Connected nodes and wire webs	8
Tinted icon tiles, filled glyphs	6
Large numerals, small labels	6
One dark, lit card per set	5

Atmosphere outside, paper inside.

Proposed direction

Soft light and varied gradients carry the feeling. Calm, well-ordered paper carries the information. The references do this with purple and blue. Faith Works does it with pink and yellow only.

What we take

- Gradient where it earns it: a few signature elements, flat everywhere else
- The hero feather: pink pooled top-right, warm yellow far corner, clear white base
- Tinted rounded-square icon tiles with a solid glyph in the same hue
- Hub-and-spoke nodes: white circles, grey trunk wires, one haloed hub
- Painted, dot-screened mockup grounds with glassy-outline cards
- Bold, tightly tracked Poppins headlines with generous air around them

What we leave behind

- Purple, blue, teal, orange and green. They belong to the references, not to us
- Frosted glass fills, and glass double-layer or 3D icons
- Outline-only, generic “AI” symbols: brains, circuits, robots
- One gradient reused everywhere, or gradient text on light grounds
- Serif italic accents and mixed type families
- Decorative network diagrams with no real connection logic

Five principles

Proposed

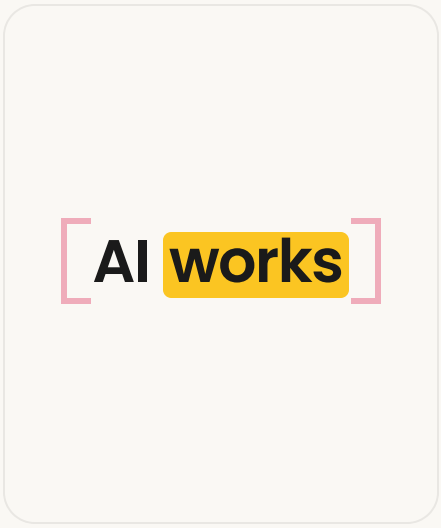

Light before colour

Colour arrives as soft light in the background, never as flat blocks of saturated fill.

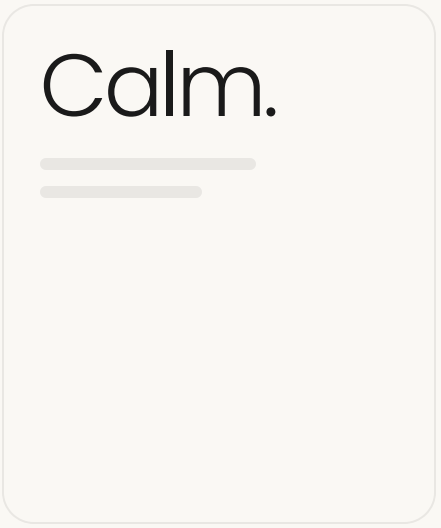

Paper floats

Information sits on calm Works White paper that hovers above the atmosphere.

One bracket, one block

Emphasis borrows from the logo: pink brackets frame, a yellow block highlights. Once per view.

Bold ideas, quiet body

Bold, confident headlines, light and steady body, plenty of space between them.

People in the frame

Real learners and facilitators in real rooms. AI is shown through people, not robots.

Four colours, nothing added

Established

Works White

Canvas and paper

#FAF8F4
RGB 250 248 244

Soft Charcoal

Text and primary action

RGB 26 26 26

Faith Pink

Warmth, framing, light

#EFACBA
RGB 239 172 186

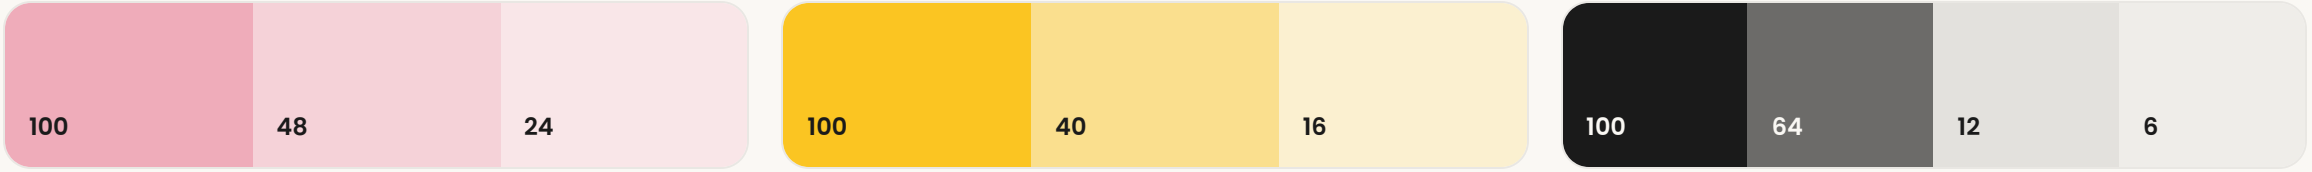

AI Light Yellow

Spark, highlight, focus

#FBC522
RGB 251 197 34

Tints for surfaces and states

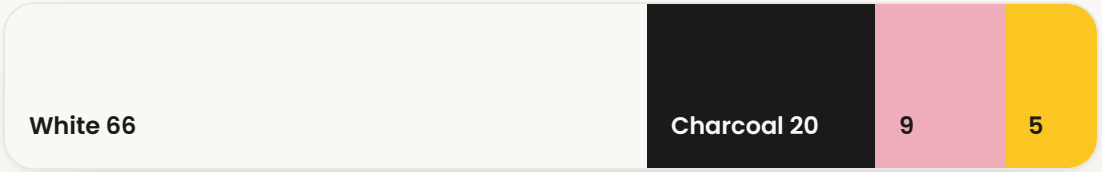

Proposed

Tints are the brand colour mixed with Works White, written as the percentage of colour. No other hues are permitted.

Proportion on a typical page

Proposed

Pink and yellow together never exceed about 15 percent of a page, counting blooms at their visible strength.

Rules of use

- **One accent per section.** A section leads with pink or with yellow. They only meet inside a bloom.
- **Pink frames, yellow sparks.** Pink for brackets, warmth and large fields. Yellow for the single highlight, focus and the primary button's icon.
- **Charcoal speaks.** All running text is charcoal or a charcoal tint. Never pink or yellow text on light grounds.
- **No new hues.** Status colours, if a product ever needs them, are a separate decision that comes back for approval.

Text contrast

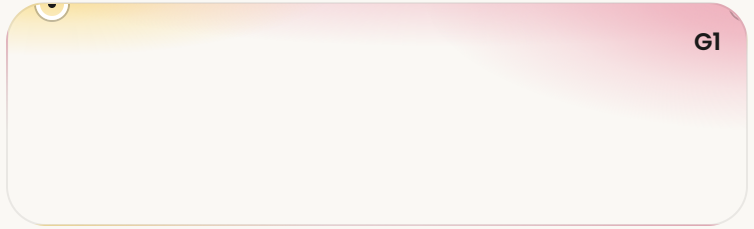

WCAG 2.2

Charcoal on White	16.4:1	AAA
Charcoal on Yellow	10.9:1	AAA
Charcoal on Pink	9.3:1	AAA
Charcoal 64 on White	5.0:1	AA
Pink on Charcoal	9.3:1	AAA
Pink on White	1.8:1	Fail
Yellow on White	1.5:1	Fail

Six grounds, six jobs

From reference | Proposed stops

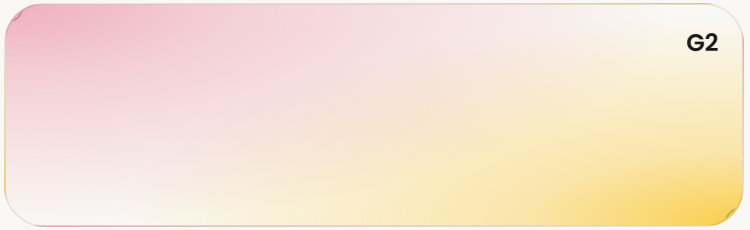

Every gradient is built only from the four brand colours and their tints. Each has a different geometry and one job. White rings mark focal points; arrows mark linear direction.

Feather — Hero only

Pink 100 → 28 · 56% → 0 · Pink 60 base band · Yellow 60 → 0 · 85% · White

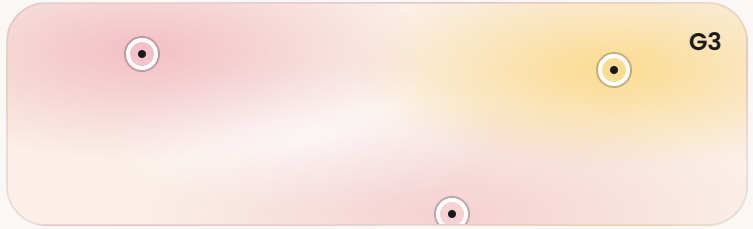

Pool top-right, feather along the top edge, warm yellow far corner. Mirrored and moved above.

Corner bloom — Covers, chapter openers

Pink 95 → 50 · 35% → 0 · Yellow 80 → 35 · 35% → 0

Two radials, opposite corners. Pink top-left, yellow bottom-right. Never in the hero.

Soft mesh — Card headers, covers

Pink 70 · Yellow 45 · Pink 45 · White lift · Warm paper

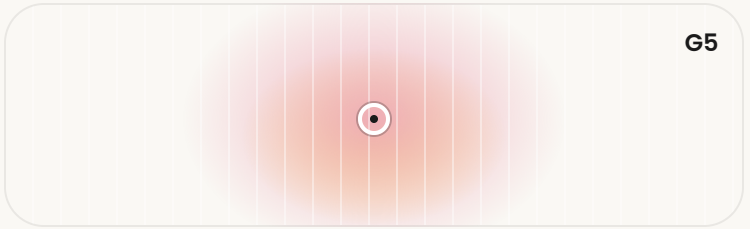

Four radials blended over warm paper. Low contrast, no hard edges.

Sweep — Small tiles, fills, badges

Pink · 0% · Blend · 46% · Yellow · 100%

Linear 118°. The only full-strength pink-to-yellow mix. Keep under 240px wide.

Light column — AI moments, one focus

Pink 95 → 45 · 50% · Yellow 55 core · White 38 · 1px / 14px

Tall narrow radial with vertical striation. Holds one centred element.

Night glow — One dark card or band

Charcoal · Yellow 55 → 0 · 75% · Pink 45 → 0 · 70%

Yellow light from above the top-right, pink rising bottom-left. White text.

Gradient where it earns it

Proposed

Buttons carry texture. Badges and labels stay mostly flat: the pink-to-yellow gradient is kept for a few signature elements, never more than one per section. Loudness falls down the ladder.

Hierarchy, loudest first

1 Book a call →

Primary CTA Textured

Charcoal sheen, linear 180° #3A3A3A → Charcoal, inner top light. Icon disc: radial Yellow 40 → Yellow. One per view.

2 Featured AI for leaders

Signature accent Gradient

Linear 100°, Pink 0% → Yellow 100%. Featured badges, the hero eyebrow ring, progress fills.

3 See programmes

Secondary button Textured

Warm light: radial Pink 12 → Pink 48 → Pink from the top. No arrow.

4 Masterclass Strategy Live

Chips and status Flat

Pink 24 or Yellow 16 fill with charcoal text; charcoal for live status.

5 6 weeks In person

Information labels Flat

No fill, hairline border, Charcoal 64 text. Quietest element.

The gradient set

Max one per section

New cohort [AI for leaders and teams]

Module 3 of 6 50%

Textured buttons, flat labels

Book a call → Talk to us Read the guide

Leadership AI tools Beginner 90 min Live All topics

Gradient allowed

Featured badge, hero eyebrow, progress fill, cover art.

Never a gradient

Nav links, form fields, info labels, chips, body text.

Poppins, one family

Established

Aa

Geometric and friendly, with perfect circles that echo the pills and blooms. The personality comes from weight contrast: SemiBold for headings, Regular for reading, Light for large numerals.

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz 0123456789 & ? ! %

300 Light	Learning that lasts Large numerals and stats
400 Regular	Learning that lasts Body, quotes
500 Medium	Learning that lasts Buttons, chips, labels
600 SemiBold	**Learning that lasts** Display, H1, H2, H3, card titles
700 Bold	**Learning that lasts** Rare. Short emphasis only

Scale for web, desktop sizes

Proposed

AI Foundations for leaders

Body L
18 / 1.6 / 400

Hands-on sessions where every exercise uses your own documents and decisions.

Body
16 / 1.6 / 400

Body copy stays at 16px or larger on the web, with lines under 75 characters.

Label
13 / 1.4 / 500

Sentence case labels, never all caps

Mobile: Display 44, H1 34, H2 24, H3 18. Body sizes do not shrink. Use clamp() between 375px and 1440px.

The wordmark and the mark

Established artwork

Primary wordmark on Works White

Mark on Works White

Mark on Charcoal

Reversed wordmark on Charcoal

On a bloom, the wordmark always sits on a paper plate

Clear space and minimum size

Proposed

2x

2x

F[ai]th Works

2x

x is the width of one pink bracket. Keep 2x clear on every side. Minimum width: wordmark 120px on screen and 30mm in print; mark 24px and 8mm.

Anatomy

- Brackets in Faith Pink
- Block in AI Light Yellow
- “ai” and type in Charcoal

Never

Stretch or squash

Recolour any part

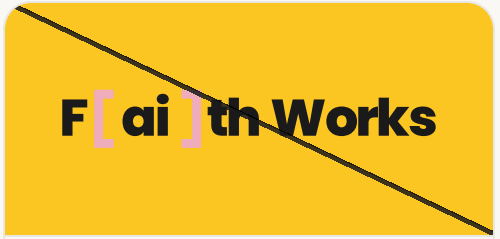

Set on Pink (the brackets disappear)

Place on a busy photo

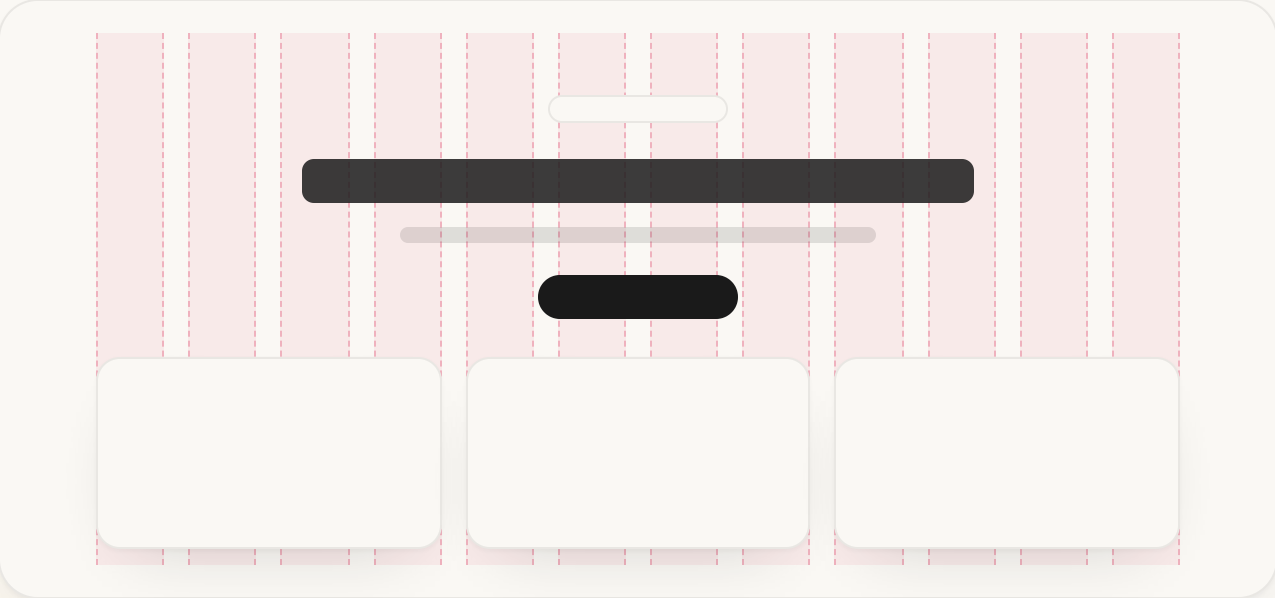

Add shadows or effects

Set on Yellow (the block disappears)

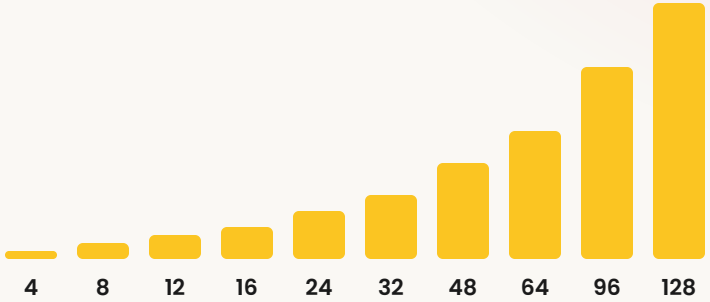

Generous, centred, calm

Proposed

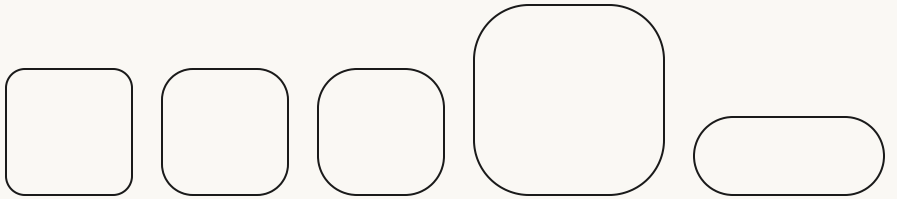

12 columns, 1200px max content width, 24px gutters, 64px outer margin on desktop. Hero and section intros centre; long reading and forms align left.

Spacing scale, base 8

Section padding 128 desktop, 80 mobile. Card padding 24 to 32.

Radius by role

10 Input

16 Icon

20 Card

28 Panel, media

Pill: buttons, chips

Four grounds, three surfaces

Proposed

Feather, G1
Hero only

Soft bloom
Default section ground

Dot field
Node webs and tools only

Night glow, G6
One dark moment per page

Paper
Works White, hairline edge, long soft shadow. Holds all reading content.

Lit paper
Paper with a G3 mesh header band.

Night
One emphasis card in a set.

Surface rules

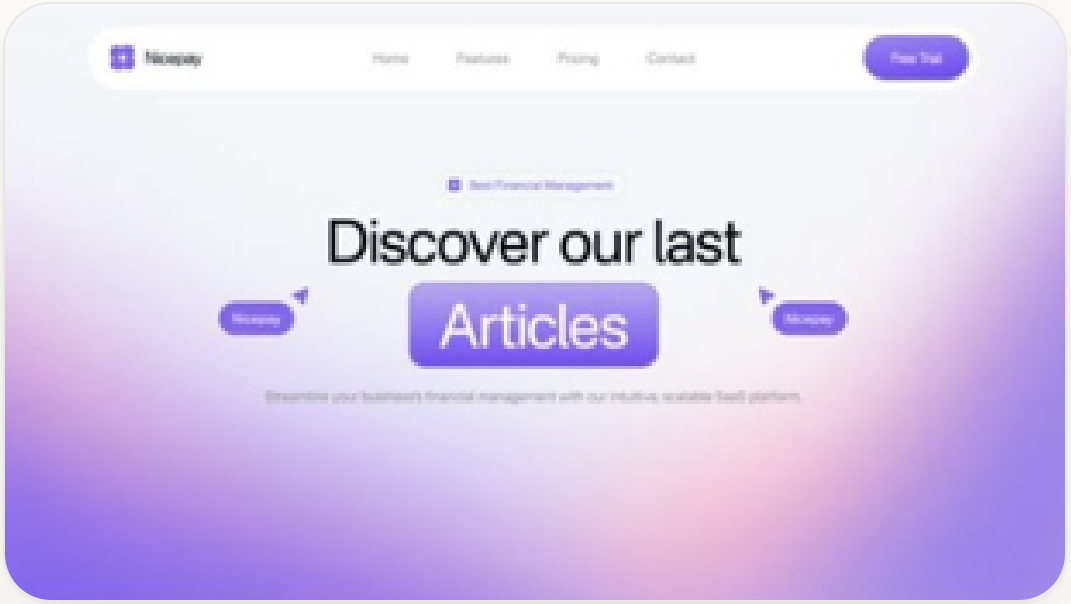

- Reading content always sits on paper, never straight on a gradient.
- No frosted glass fills. Glassy outline frames only on painted mockup grounds.
- Two gradient recipes per section at most, one of them a ground.
- Grain at 3 to 5 percent. It should be felt, not seen.

The feather, flipped and raised

From reference: gradient only

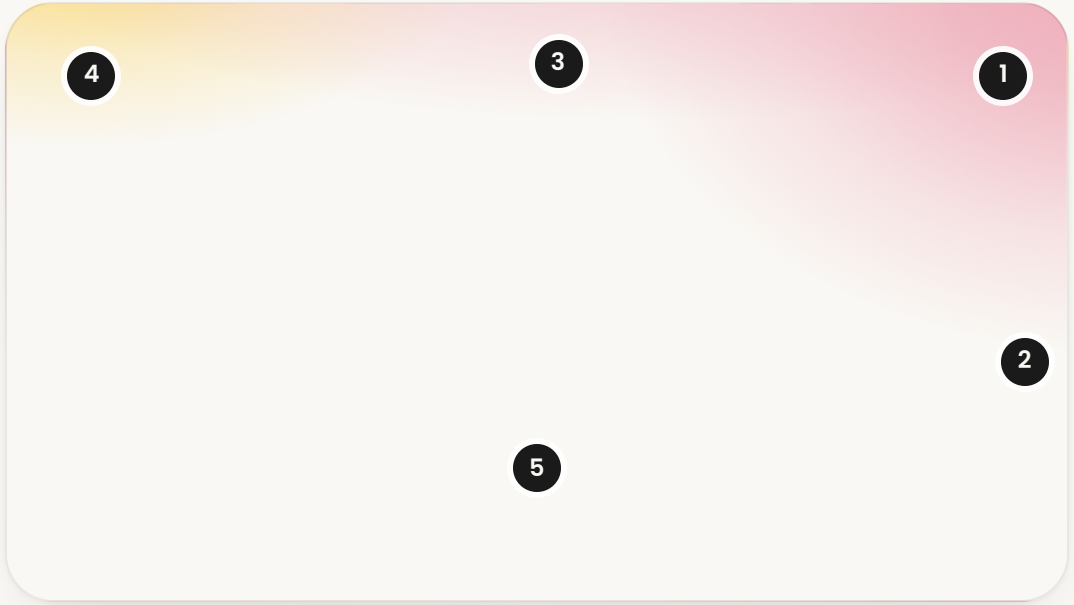

We take one thing from the hero reference: how its colour pools in one bottom corner and feathers across the base. We mirror it and move it above, so the pool sits top-right, and recolour it in pink and yellow. Its layout, pill headline, floating tags and nav are not used.

Supplied reference

Mirror, move up

Faith Works feather, G1 (gradient alone)

1 Pool

The deepest colour sits in the top-right corner: Faith Pink 100%, radial 60 × 80% at 104% -6%.

2 Rise

The pink runs down the right edge to about 65% of the height, softening from 78% to 28% strength.

3 Feather

A wide band (72 × 36%) carries Pink 60% along the top edge, behind the nav, and fades before the centre.

4 Warm far side

The reference's lighter second hue becomes AI Light Yellow 60%, a soft glow in the top-left corner.

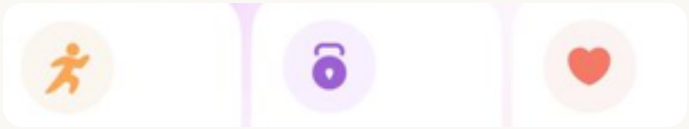

5 Clear base

The lower half stays Works White, so the headline, buttons and node web sit on a clean ground.

Tinted tile, solid glyph

From reference

Supplied reference

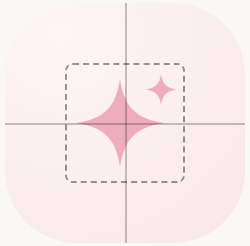

Pale tint of one hue, solid glyph in the full hue, no outline, no glass.

Faith Works adaptation

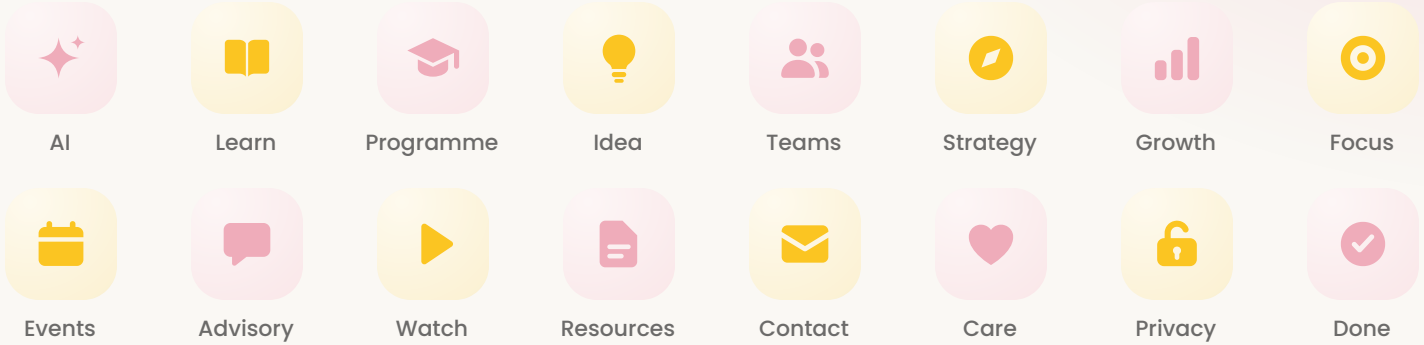

Same recipe. Circle becomes a rounded square; hues come from the palette.

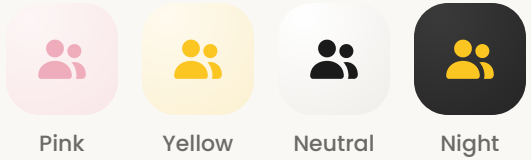

Construction

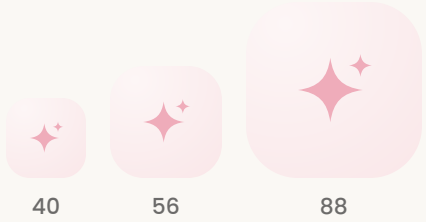

Tile 56px, radius 17px (30%).
Glyph 28px, centred (50%).
Tile fill: radial at 22% 12%, tint 6 → tint 24.
Glyph: full brand hue, solid.

Core set, sixteen glyphs

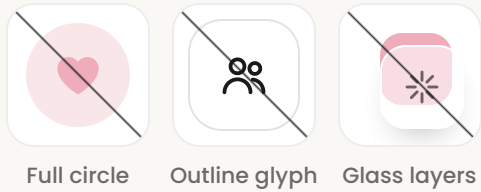

Colourways and sizes

Never

One hue per tile. Never a gradient on the glyph. Every icon ships with a visible text label.

Real marks, our concepts

Third-party marks | Concept icons provisional

Two families that never mix. Real AI products appear only as their official marks, in a white circle. Ideas about AI use our own filled glyphs on tinted tiles. Same weight, same scale, one system.

Tool marks

Official artwork only

ChatGPT
Claude
Gemini
Perplexity
Notion
Zapier
Canva
GitHub Copilot

- 44px white circle, 1px Charcoal 6% ring, soft shadow. Mark 46% of the circle.
- Original brand colours, never recoloured to Faith Works hues. OpenAI, Notion and GitHub Copilot are black by their own guidelines.
- Paths come from each brand's published SVG (via Simple Icons). Never redraw, stretch or crop a mark.
- No mark for Microsoft Copilot or Midjourney yet: request official files before use.

AI concept icons

Tile style from the approved icon reference

Prompting

Voice
Knowledge
Insights
Data privacy
Human review

Never put a brand mark on a tinted tile, and never put a concept glyph in a mark circle. No brains, robots or circuit boards. Concept icons stay provisional until a dedicated AI icon reference is supplied.

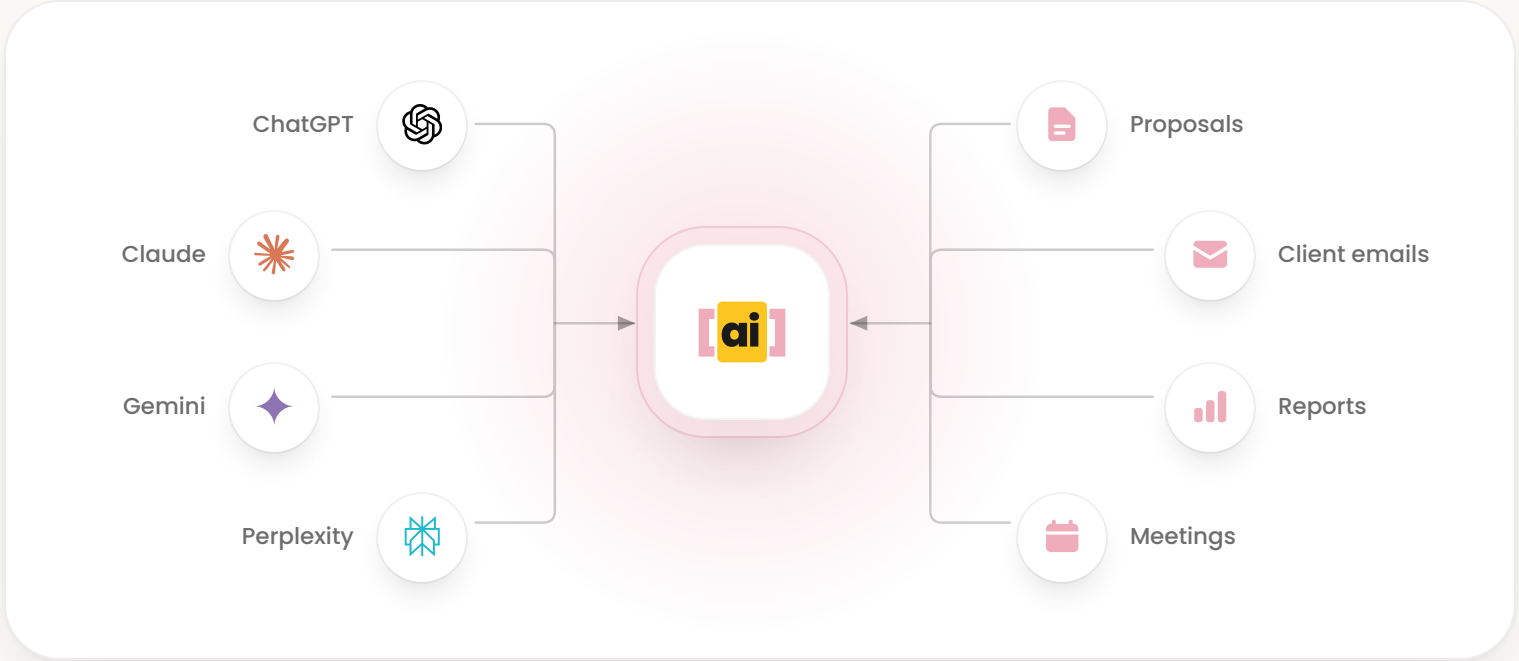

One hub, two branches

From reference

Supplied reference

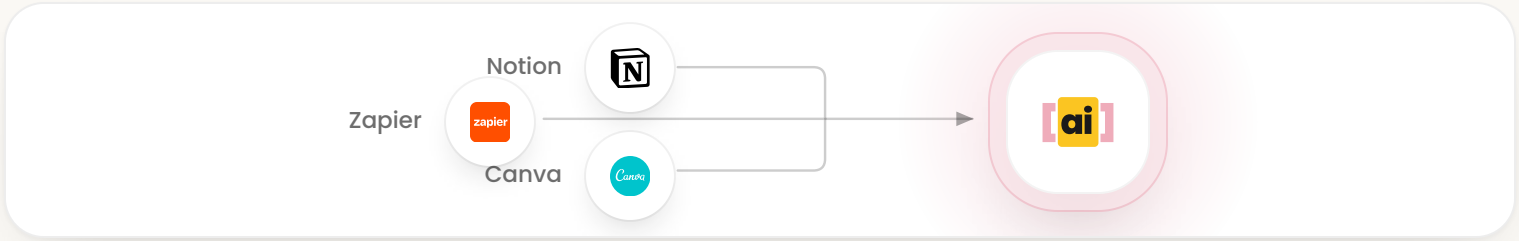

Hub	88px rounded box (radius 26) in a glassy outline: 8px translucent white frame, 1px Pink 55% edge. Holds the Faith Works mark. Never a circle.
Nodes	44px white circles, one mark in its brand colour or one glyph. Up to four per side, staggered: outer pair nearer the hub.
Labels	12px Charcoal 64, outside the node, away from the hub.
Wires	1.25px Charcoal 22%. Each node runs to a shared trunk, the trunk enters the hub with a small arrowhead.
Logic	Left: tools that go in. Right: work that comes out. Symmetric, centred on the hub.

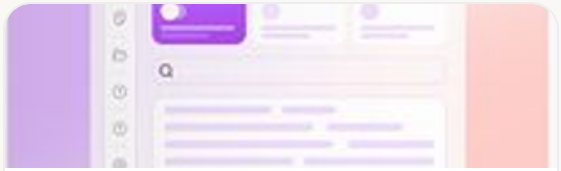

Tool marks on the left are third-party; outputs on the right use our glyphs in Faith Pink. Illustrative content.

Same system, compact: one side only

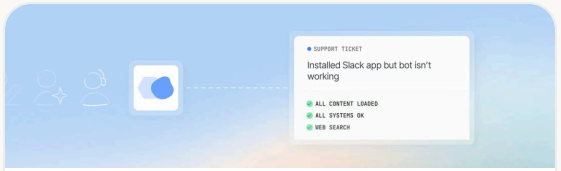

Painted grounds, outlined cards

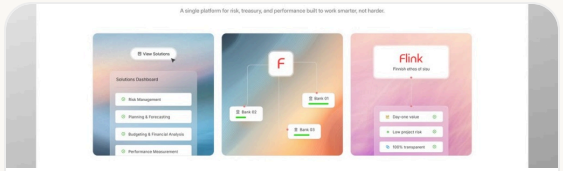

From reference

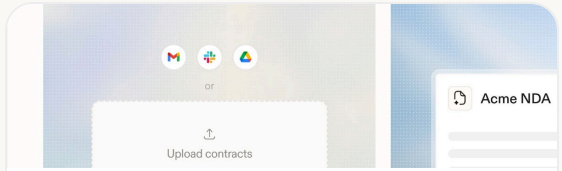

Soft multi-hue field
Two hues blended across the whole panel

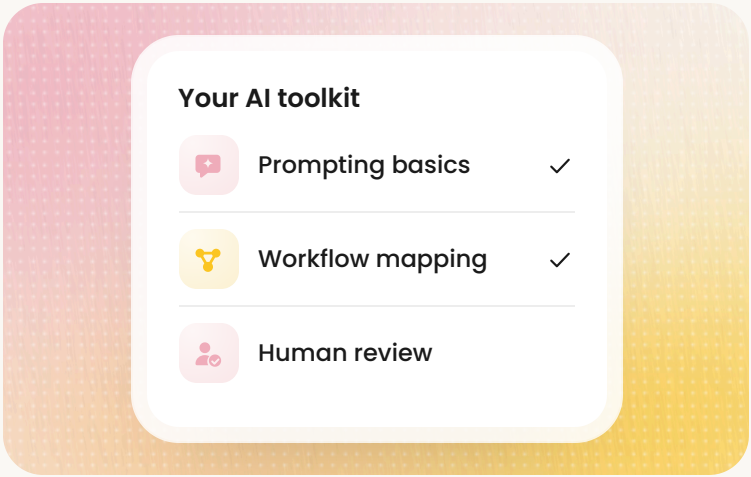

Glassy outline
White card inside a translucent frame

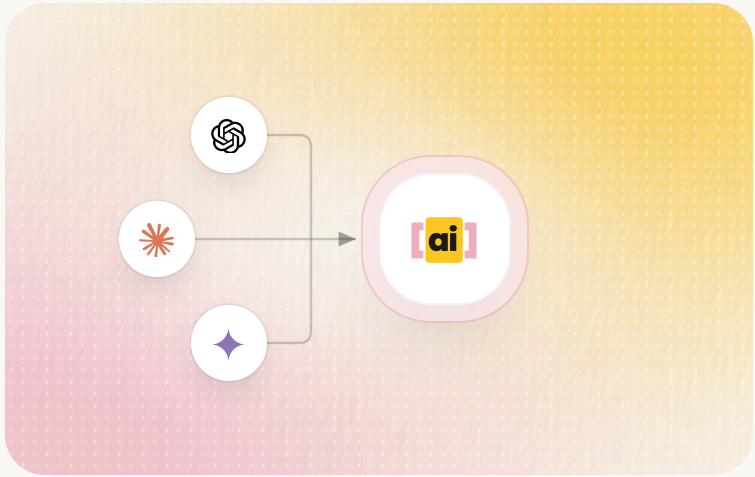

Fibre texture
Fine brushed streaks, one direction

Dot screen
1px white dots on a 6px grid

Layer 1 · Field
One of three painted fields (Rose, Sun, Dawn), built only from pink, yellow and white. Rotate them across a page.

Layer 2 · Fibre
Brushed texture built into the field at ±5% tone, angled 4° to 14°. Felt, not seen.

Layer 3 · Dot screen
White 1px dots, 6px grid, 80% opacity. Sits above the field, below all content.

Layer 4 · Content
Glassy-outline cards (7px white 42% frame) or the node system. Never both in one panel.

Proposed

Photography: real rooms, warm light

Workshop in progress
Annotation card over photo

Candid, people mid-task, screens visible but not the subject. Crop tight to faces and hands. Rounded 28px frame. No stock robots, glowing brains or binary code.

Gradient covers, when there is no photo

From reference

Calm, and only on purpose

Proposed

Motion explains what changed. One orchestrated entrance per page, then stillness until someone acts.

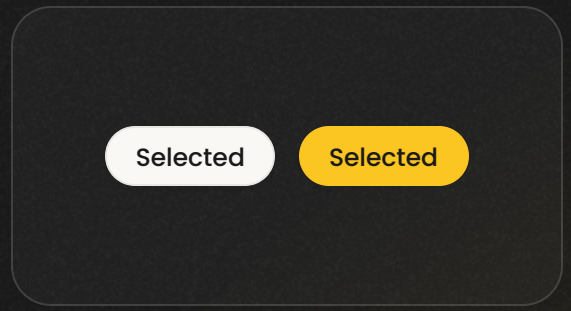

Arrive

Hero content rises 16px and fades in, staggered 60ms. 600ms, once.

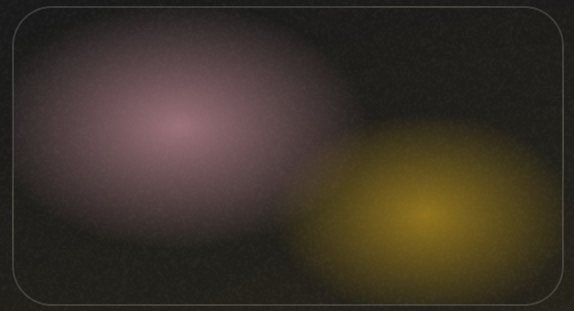

Lift

Cards and buttons rise 2 to 4px with a deeper shadow on hover. 200ms.

Confirm

State changes cross-fade colour, never jump. 160ms. Pair with text or an icon.

Drift

Blooms may drift slowly, 30s or longer per loop, on the hero only. Off under reduced motion.

120ms

Micro feedback, press

200ms

Hover, focus, toggles

320ms

Menus, drawers, accordions

600ms

Page entrance only

Easing cubic-bezier(.2,.7,.2,1) for entering, (.4,0,1,1) for leaving, exits 30% faster. Animate opacity and transform only. Respect prefers-reduced-motion by showing the final state.

Soft look, firm standards

Target: WCAG 2.2 AA

Contrast

Body text 4.5:1 minimum, large text and UI edges 3:1. Pink and yellow are fills, never text on light grounds. Text on gradients is checked at the lightest and darkest stop.

Focus

On light

On dark

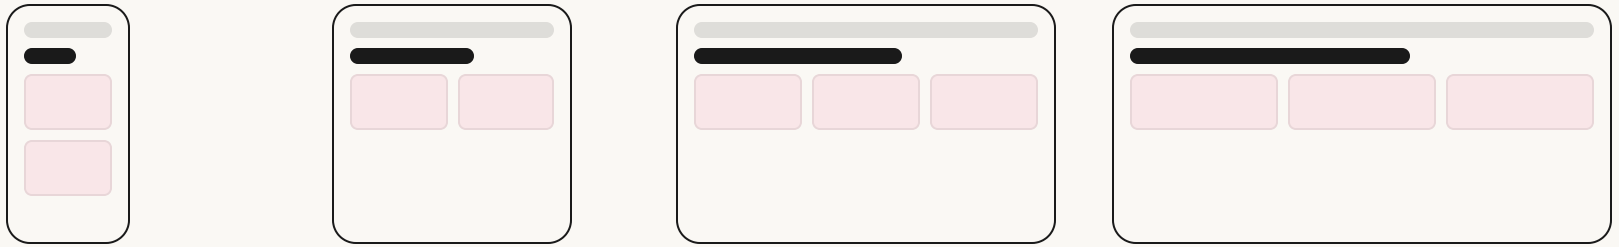

2px ring, 3px offset. Charcoal on light, yellow on dark. Never removed.

Touch and text

Targets 44 by 44px minimum with 8px between. Body 16px+. Every icon has a text label or aria-label. Meaning never by colour alone.

Breakpoints

Proposed

375 Mobile
1 column, 20px margin

768 Tablet
2 columns, 32px margin

1024 Laptop
3 columns, 48px margin

1440 Desktop
1200 max, 64px margin

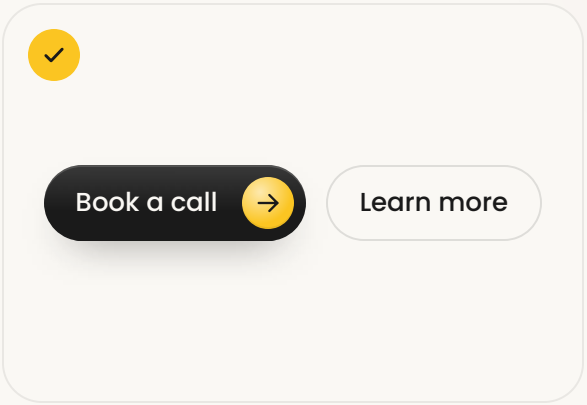

Floating decorative cards in heroes are hidden below 768px. Blooms simplify to one radial field on mobile for performance. No horizontal scroll at any width.

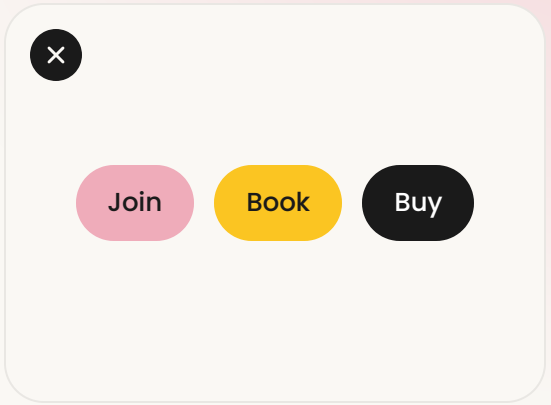

Do place reading content on paper.

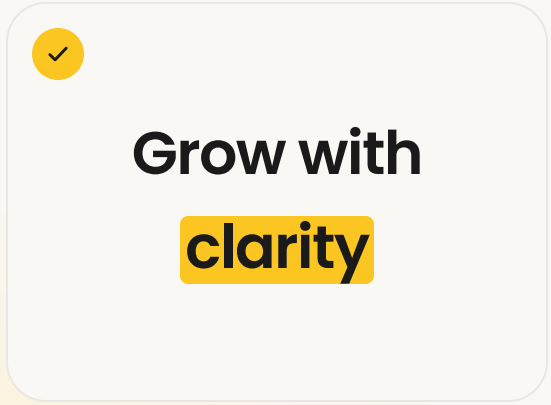

Don't run body copy over strong colour.

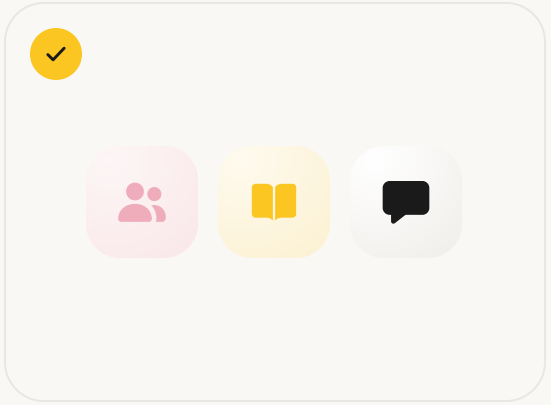

Do use one primary action per view.

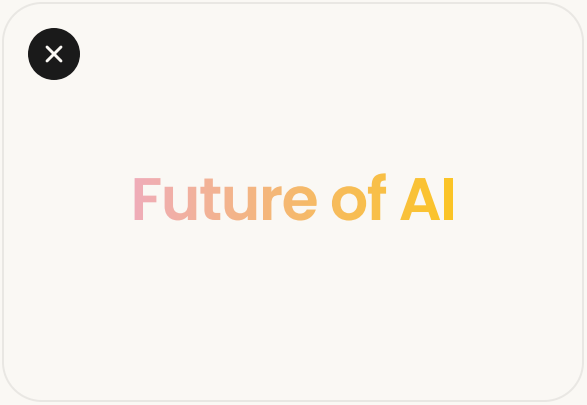

Don't make competing coloured buttons.

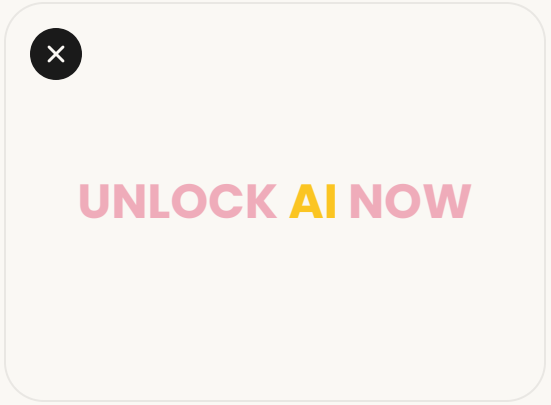

Do highlight one idea with the yellow block.

Do use tinted tiles with solid glyphs.

Don't set gradient text on light grounds.

Don't set text in pink or yellow, or shout in caps.

Before anything ships

Tick every box, or note why not.

Colour

- [ ] Only the four brand colours and their tints
- [ ] One accent per section; pink and yellow meet only in blooms
- [ ] No pink or yellow text on light grounds
- [ ] Contrast checked: 4.5:1 text, 3:1 UI

Type and logo

- [ ] Poppins only, from the five weights
- [ ] Headlines SemiBold, sentence case, no all caps
- [ ] One bracket or block emphasis per view
- [ ] Logo unaltered, 2x clear space, on paper over blooms

Surfaces and imagery

- [ ] Hero uses the G1 feather; reading content on paper
- [ ] Gradients from the approved recipes; max two per section
- [ ] Real people and rooms; node webs show real flows
- [ ] Icons: tinted rounded-square tile, solid glyph, labelled

Interaction

- [ ] One primary button per view; one gradient element per section
- [ ] Visible focus ring on every interactive element
- [ ] Targets 44px+, tested at 375, 768, 1024, 1440
- [ ] One entrance animation; reduced motion respected
